

BOWLING LANES

*for fun, entertainment
and thrills*

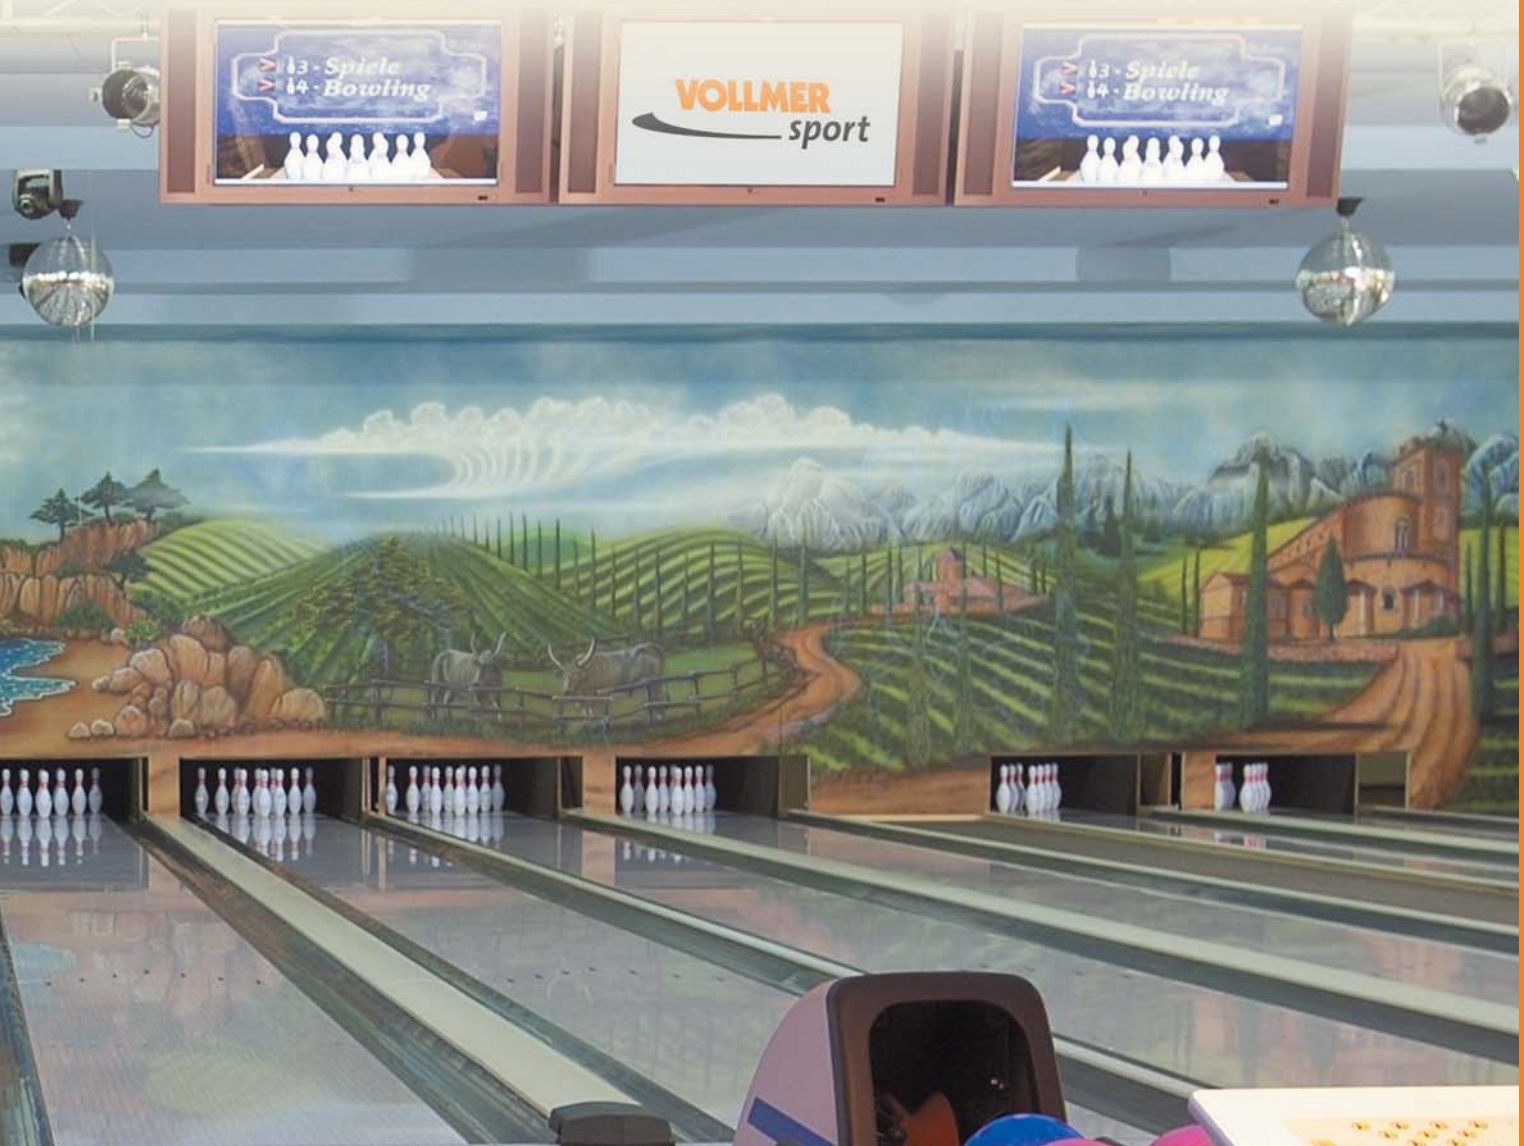

VOLLMER
— *sport*

VOLLMER Sport top-of-the-m

range bowling lanes

A great sports activity for all the family

VOLLMER bowling lanes are a byword in the leisure industry for fun, thrills and first-class entertainment.

Our bowling lanes are an absorbing recreational pursuit. Ideal for children's parties, disco nights or fun bowling, they offer something for everyone. The best way to judge is to see for yourself: sample the atmosphere at one of VOLLMER Sport's many bowling centres and you'll find yourself hooked on this gripping leisure pursuit before you know it.

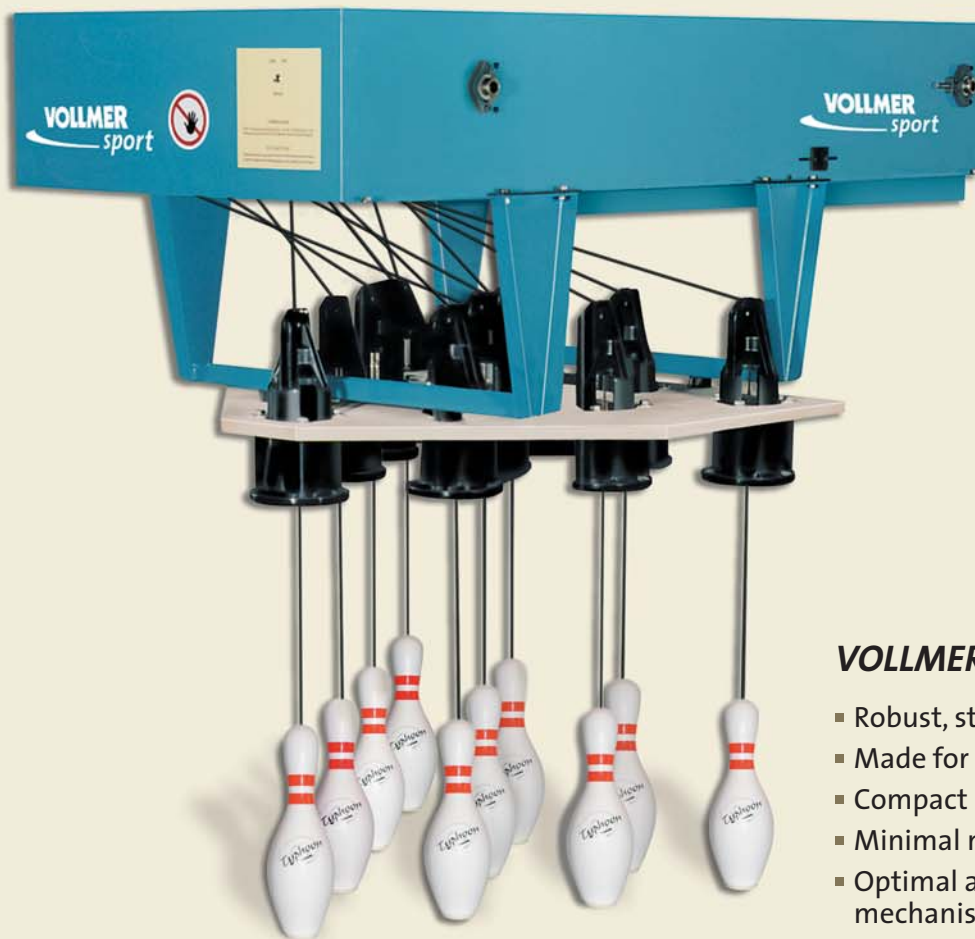

VOLLMER Sport pinsetters are among the best in their class

Pinsetter

robust, compact, unique

The VOLLMER Sport pinsetter has a long record of success under tough conditions.

The overall design is geared to simplifying pin set-up, and the integrated electronic disentangling mechanism is among the best available. These features, together with a high setup speed, can be relied on to ensure the smooth running of your bowling lanes.

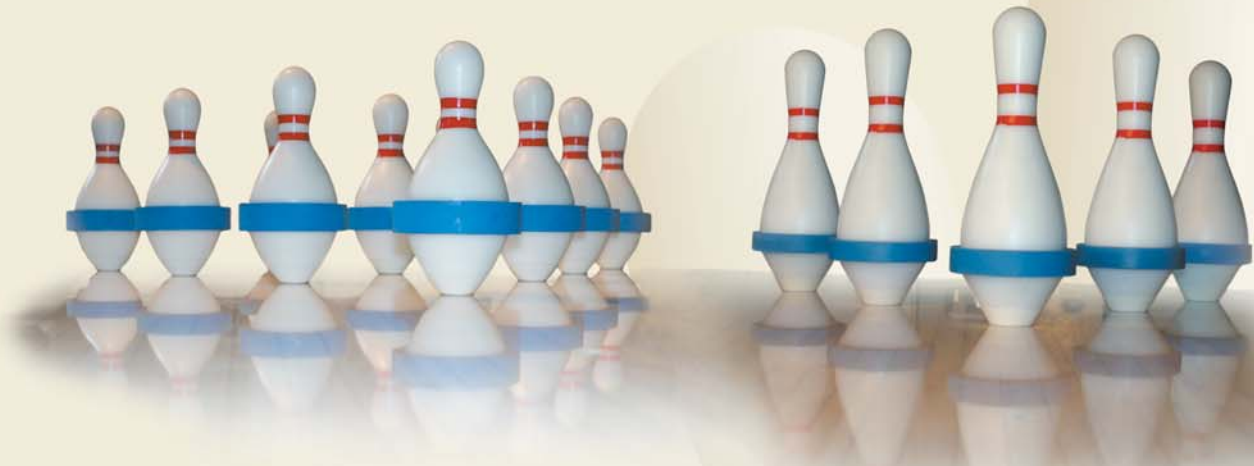

VOLLMER Sport advantages

- Robust, stable design
- Made for continuous use
- Compact and clearly laid out
- Minimal maintenance costs
- Optimal automatic disentangling mechanism

The ball return elevators are highly reliable, and there are no acceleration problems due to oil contamination or jammed pins. By using black setting ropes and an optional sweep flap to conceal the setup process, VOLLMER Sport has managed to combine the advantages of a rope-type pinsetter with the appearance of a ropeless one.

The presence of a mechanic is not necessary during games – a fact which operators of large-scale bowling centres have been quick to take advantage of.

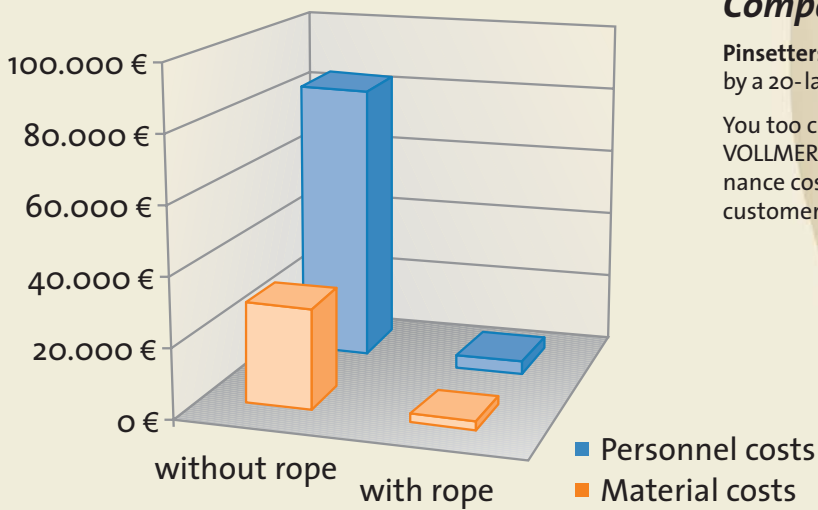

VOLLMER Sport pinsetters come in a variety of models including duckpin and five-pin bowling, variations which are widespread in Canada and the northern USA.

The optional VOLLMER Sport sweep flap conceals the pinsetting process.

The airbrush motif of the bowling centre can be extended to the sweep flaps on request.

Technical innovation with a uniform design for your bowling centre.

Comparison of operating costs

Pinsetters with and without ropes - as exemplified by a 20-lane bowling centre, in relation to pinsetters.

You too can benefit from the cost advantages of a VOLLMER Sport pinsetter. The extremely low maintenance costs will enhance both your profit and your customers' enjoyment.

VOLLMER Sport scoring systems bring variety

Scoring systems for every requirement

VOLLMER Sport scoring systems offer virtually unlimited possibilities for an enhanced bowling experience. Short movies and attractive leisure games can be incorporated to bring the game to life.

Lane management

- Simple operation for personnel and players
- Sophisticated computer technology
- State-of-the-art LCD monitors for outstanding colour images
- Proven software for reliable operation day after day
- Update service for games and movies
- Automatic bumper control for children
- Option of incorporating advertising displays for extra income

The possibility of incorporating advertising displays offers an additional source of income.

The automatic bumper system can be activated for children and deactivated again for adults – that way the game is guaranteed to be much more enjoyable for fun for younger players.

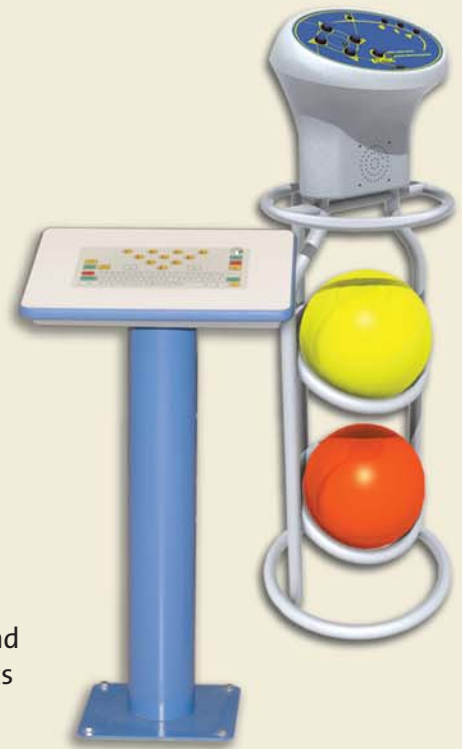

Bowling centre management

The front desk bowling centre management computer offers a range of possibilities and makes the day-to-day running of the centre a whole lot easier.

- Lane reservation software and lane release function
- Charging by game or playing time
- Shoe hire management
- Charging for other games, e.g. billiards
- Comprehensive management reports
- Online service to keep you up to date
- Program updates for constantly renewed interest

You can choose between two scoring systems:

VOLLMER Sport Scoring

- Seven different leisure games
- International bowling game
- Wide range of graphic displays and animations for children and adults
- Lane reservations and charging, Management reports
- Advertising displays
- Extremely easy operation thanks to optimal user prompts

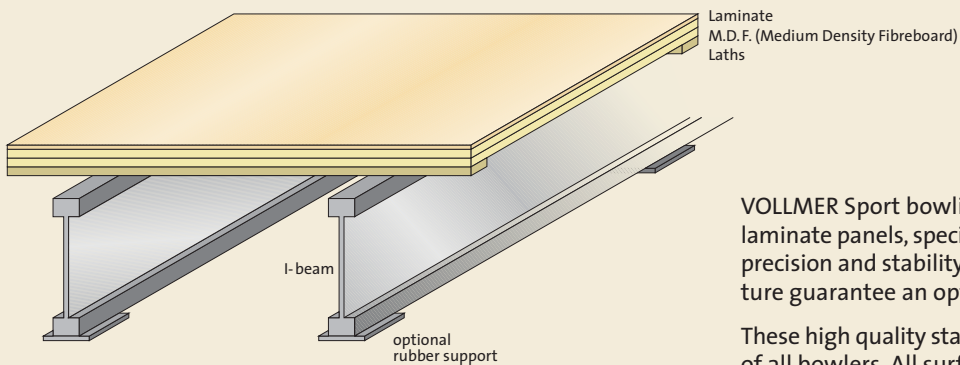

Steltronic scoring systems

- One of the leading scoring systems world-wide, with a wealth of animations and graphics
- Brilliantly designed 3D movies
- Choose from 300 different animations
- Loadable magnetic charge cards
- Freely selectable colour settings
- "BLS League Software" for management of bowling competitions
- Food and drink charging
- Database for customer data
- Photostrike

VOLLMER Sport bowling lanes - top quality for all requirements

Bowling surfaces the Basic of every bowling lane

VOLLMER Sport bowling surfaces are made of thick HPL laminate panels, specially designed for bowling centres. The precision and stability of the laminate panels and substructure guarantee an optimal ball rolling action.

These high quality standards enable us to cater to the needs of all bowlers. All surfaces are USBC- inspected as a matter of course.

Our laminated bowling surfaces are supported by a sturdy substructure, offering ideal conditions for the ultimate bowling experience.

VOLLMER Sport advantages

- Optimal antifrictional properties
- High abrasion resistance
- Very hard surface
- Long lasting
- „Glow in the dark“ effect

Ball collectors

The VOLLMER Sport ball collector not only gives a visual focus to your bowling lanes. In addition, the ball is slowed right down in the ball collector before rolling onto the rack, thus ensuring a high level of safety for your players.

VOLLMER Sport advantages

- Slows balls right down
- High level of safety for players
- High-quality workmanship
- Smooth ball return

Lifter Hood Rack system

With its futuristic design, this system is attractive to look at and fits perfectly into the architecture of any bowling centre. In this system the balls are returned underground – a further safety factor for VOLLMER Sport users.

VOLLMER Sport bowling lanes - individual and unique in design

Design and running lights for greater individuality

Besides perfectly functioning technology, the design of a bowling centre is nowadays also a vital factor in economic success.

In addition to the traditional graphic panels with "glow in the dark" effects, the incorporation of airbrush images offers unlimited possibilities, while the running light system creates additional light effects between the bowling lanes.

VOLLMER Sport running lights

The running lights alongside the bowling lanes give your installation the ultimate visual impact. Whether for children's parties or disco bowling – no modern bowling centre should be without this design highlight!

The unit consists of sturdy aluminium rails with 3 colour LEDs connected to the control unit. The control unit is very easy to operate and offers up to 30 different lighting effects plus special effects, e. g. for strikes.

Airbrush design lends an individual touch to your bowling centre

Thanks to airbrush techniques, we can design your bowling lane to your personal specifications. In consultation with our airbrush partners, you can choose your own motif and desired colours in order to give a unique touch to your installation.

Also of course with "glow in the dark" and "picture-in-picture" effects. An individual atmosphere for an enhanced bowling experience.

VOLLMER Sport offers fun bowling for all age groups

Bumper system a must for every bowling centre

To enjoy the game, children need to be able to hit the pins regardless of the force behind the ball. The purpose of bumper systems is to prevent gutter balls, so that the ball quite simply stays on the bowling surface.

The bumpers are actuated automatically by the scoring system. Each player decides for themselves whether or not to use them in their game. The function is activated at the click of a mouse.

After all, it's in your interest to ensure that children have a successful and enjoyable game on your bowling lane – that way they'll come back for more!

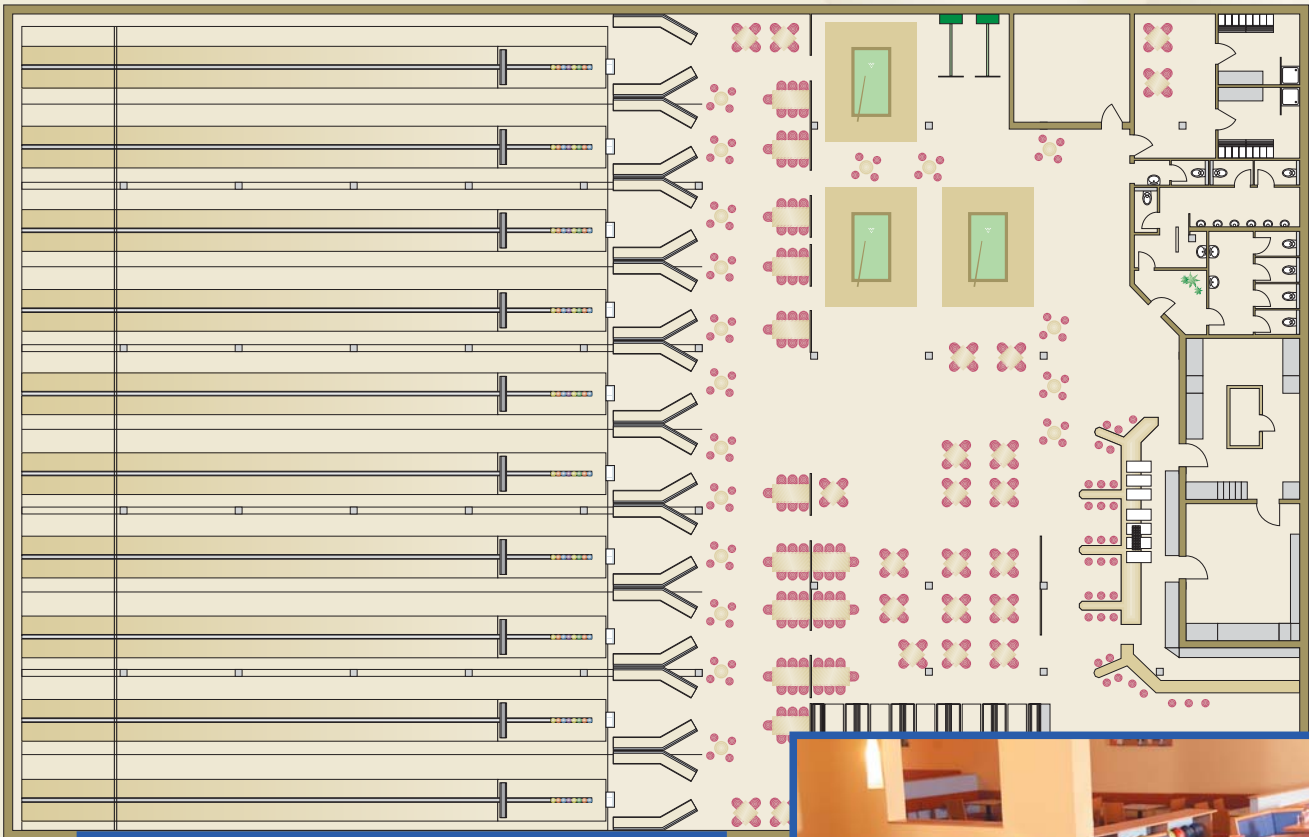

Planning and refurbishment

The planning department of VOLLMER Sport works in close cooperation with architects. Why not take advantage of our years of experience in planning and refurbishing bowling installations? We'll be happy to give you examples of various layout options and information on other structural possibilities.

We provide all the components necessary to add the finishing touches to your installation. The scope of the refurbishment is up to you.

Let our experts advise you, and benefit from the long experience of a competent partner. Our specialist consultants are also readily available for on-site assistance.

A modern bowlingcenter with spirit and good vibes, where every bowler feels good and new guests could be attracted.
